Mobile Workstyle

IT Managers guide to introducing
simplicity in the work culture

FUJI XEROX 

Mobile workstyle

WORLD TRENDS

The adoption of mobile devices into our daily lives is shaping a new work culture within many organisations

Mobile devices are quickly becoming part of mainstream office work. With improvements in connectivity and display technology getting increasingly affordable, it's becoming much easier to access required information on mobile devices – anytime, anywhere. Data shows almost half of mobile users are using their smartphones for their work related tasks and on average people are spending 1/5th of their time working from outside their main office building. Because of such trends organisations are looking into ways of adopting and integrating mobility into their normal work culture.

WHAT ORGANISATIONS ARE LOOKING FOR

Technological requirements to realise this new mobile workstyle

Prominent mobile workstyles and usage

Medium and Large Enterprise

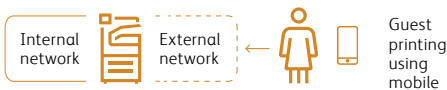

- Mobile work force such as sales or field technicians (support team) are spending the majority of their time outside the office, while travelling or meeting customers
 - Based on different customer visits, these members have a choice of working from multiple office locations
 - They use mobile devices to access and share information across the organisation
- Basic need is to kick start internal processes by scanning / printing customer orders / reports

Co-working office space

- Different members from multiple companies (Startups / Small / Medium enterprise) working from one single location, sharing common work space and IT assets
- While IT assets are shared, each company may have different process requirements such as the use of specific cloud services

Guest / Public Printing

- Guest users visiting offices or retail showrooms may have an immediate requirement to print a form or a personal document for application purposes
- Visitors accessing common public areas (e.g. Hotel reception, Airport Lounge, Public Library etc.) are looking for options to quickly scan or print directly from their mobile devices

Fuji Xerox Solutions designed for your mobile workstyle

Fuji Xerox's mobile and cloud solutions work together to provide an effective, streamlined approach to implementing a mobile workstyle into your organisation.

The next generation ApeosPort/DocuCentre VII Series range of multifunction printers are designed to work in tandem with different cloud and mobility services.

HOW FUJI XEROX CAN SUPPORT

50%

of people are using their mobile device for various document management activities including creating, editing, and reviewing documents.

20%

of an individual's time is spent working at a home office or mobile location.

70%

of organisations are looking at the benefits of adopting a mobile based work culture, with remote working as an acceptable norm.
