Smart offices

Decision maker's guide to design a future ready office

Smart offices

WORLD TRENDS

With more connected systems and devices, organisations are looking forward to realising a better return on their investments.

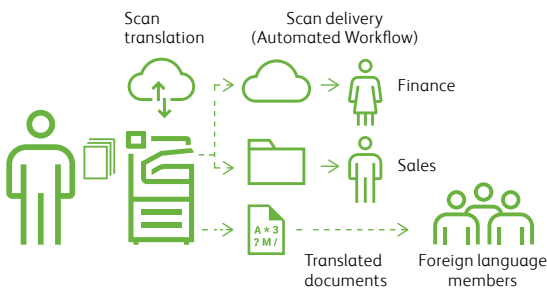

Compatibility and integration between devices and different systems has become a basic requirement to realise a smart working environment. With such inter-connected systems the number one priority for any organisation is to make their business processes as streamlined as possible – thus saving time, creating a collaborative work culture and improving overall productivity.

Technological requirements to realise a smart and connected office

Connected systems for smart offices

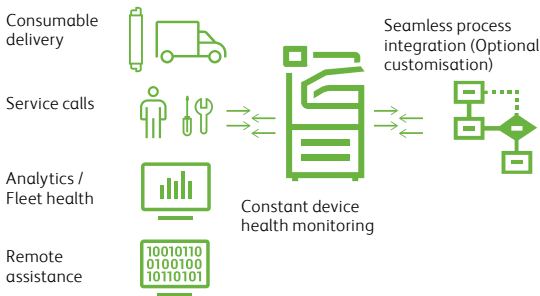

WHAT ORGANISATIONS ARE LOOKING FOR

Connected Processes

- Connect different departments with simple and easy workflows to bring higher levels of work synergies and an improvement in productivity.
- Connect different worldwide office locations to introduce a collaborative work culture with the ability to quickly share and translate documents in different languages.

Connected Devices

- Harness the power of IoTs and AI for data based informed decision making by being alerted to potential problems well in advance of the incident happening.
- Reduce dependability of on-site visits by an engineer to reduce downtime and the potential costs involved.
- Connect different IT assets by way of customisation in order to achieve better Return on Investment and better process efficiency.

Fuji Xerox Solutions designed for future ready offices

Fuji Xerox's connected solutions can bring you one step closer to creating a more connected, simple and smart work environment which can drastically boost the productivity and synergy within the organisation.

The next generation ApeosPort/ DocuCentre VII Series range of Multifunction Printers comes with standard connectivity options for constant monitoring and expandable solution framework for easy integration with other office systems

HOW FUJI XEROX CAN SUPPORT

30%

of all organisations have already adopted some kind of IoT technologies for implementing more connected and efficient systems.

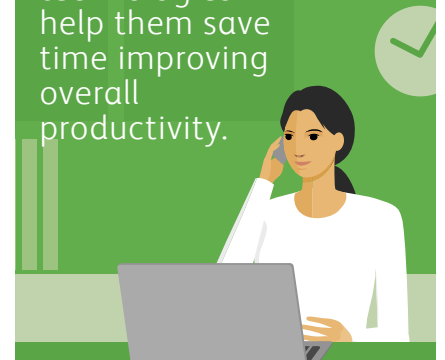

40%

of organisations consider available solution integration and compatibility of IT solutions to optimise their current resources

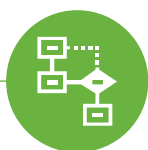

50%

of the organisations believe smart technologies will help them save time improving overall productivity.

Data source : Keypoint Intelligence 2019 report

Key requirements (Decision Makers)	Suggested Solutions	Benefits
<ul style="list-style-type: none"> Set predetermined company wide simple & single touch workflows to enable everyone in an organisation to easily access and avoid potential errors while starting a scanning workflow. 	<ul style="list-style-type: none"> Scan Delivery 	<ul style="list-style-type: none"> A simple pre-set guided experience for workflows reduces the chance of errors and overall operating time.
<ul style="list-style-type: none"> Introduce digitalisation of physical documents in multiple languages, while nourishing a collaborative work culture across multiple world wide office locations ** 	<ul style="list-style-type: none"> Scan translation 	<ul style="list-style-type: none"> Shorter turnaround times to translate physical documents directly from the Multifunction Printer (MFP).
<ul style="list-style-type: none"> One stop systems and reports to plan corrective actions in advance. Use trend based learning to improve overall efficiency of the entire fleet. 	<ul style="list-style-type: none"> RDHC 	<ul style="list-style-type: none"> AI based predictive responses can be initiated in advance to avoid any potential downtime.
<ul style="list-style-type: none"> Introduce systems to take control of the device from a remote location for quicker response rates. 	<ul style="list-style-type: none"> Remote assistance 	<ul style="list-style-type: none"> Quick turnaround, less wait for better customer satisfaction and trouble shooting.
<ul style="list-style-type: none"> Possibility to customise and integrate their MFP with top IT systems to bring more synergy and optimisation amongst existing processes. 	<ul style="list-style-type: none"> AIP 	<ul style="list-style-type: none"> Customisation of the User interface.

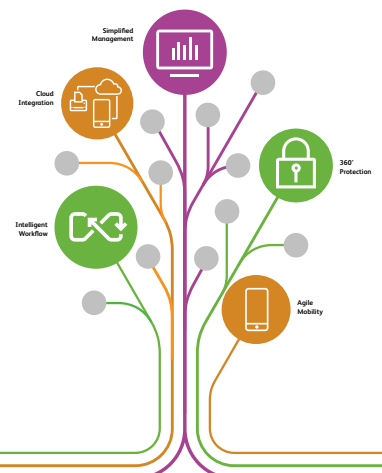

Connected Processes

- Scan Delivery
- Scan translation (Cloud Services)

Connected Devices

- Remote Device Health Check (RDHC)
- Remote assistance
- Apeos Integration Plus (AIP)

Fuji Xerox Connected Processes and Device Solutions

Connected Processes

Scan Delivery

Scan delivery is designed to automatically scan paper documents and sort them into preset destination with fewer operational steps. An apt solution for routine tasks with pre-automated workflows to bring more efficiency in the system

Scan translation (Cloud)

Cloud based service can translate electronic or printed documents across 8 different languages** (English, Japanese, Simplified Chinese, Traditional Chinese, Korean, Bahasa, Malay, Vietnamese) to allow users from different parts of the world collaborate in a most efficient and productive way

Connected Devices

Remote Device Health Check (RDHC)

Using data taken from hundreds of device sensing points, and from dozens of different components, we work on the probability of faults occurrence and take preemptive actions before a potential downtime can even occur

Remote assistance

One stop remote support services that are designed to reduce downtime for our customers by managing all their equipment effectively even at farthest of the locations.

Apeos Integration Plus (AIP)

Unleash the power of customisation by using full features of available API (Application Programming Interface) on ApeosPort devices. Customers can unlock the full potential of the their devices by developing a customised applications directly accessible from device User interface

All product names and company names mentioned in this brochure are trademarks or registered trademarks of their respective companies. The product specifications, appearance and other details in this brochure are subject to change without notice for improvements.

Reproduction Prohibitions Please note that reproduction of the following is prohibited by law : Domestic and foreign currencies, government-issued securities, and national bonds and local bond certificates. Unused postage stamps, post cards, etc. Certificate stamps stipulated by law. Reproducing works forming the subject matter of copyright (literary works, musical works, paintings, engravings, maps, cinematographic works, drawings, photographic works, etc.) is not permitted unless the reproduction is for the purpose of personal use, family use or other similar uses within a limited circle.

For Your Safety

Before using the product, read the Instruction Manual carefully for proper use. Use the product with the power source and voltage specified. Be sure to establish ground connection. Otherwise, electronic shock may result in the case of a failure or short circuit.
